

## A. Mirror glass

### Remove and install

---

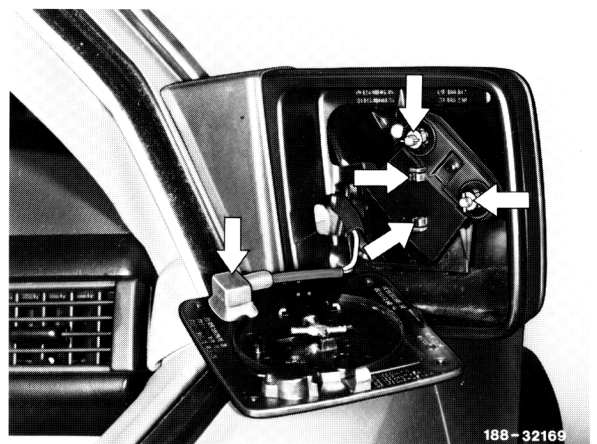

- 1 Force mirror glass out with plastic wedge and pull off plug for mirror heater.

**Note:** The mirror glass can be mounted only with the drive tappet of the electric motor in retracted position and aligned toward mirror glass mount.

- 2 Insert plug for mirror heater.

- 3 Engage mirror glass audibly into drive tappet and engage mount for turnstile (arrows).

## B. Complete outside mirror

### Remove and install

---

1 Unclip cover plate from door frame (arrows) and pull out of door trim in upward direction.

2 Unscrew fastening screw on electric plug connection and pull off plug (electric motor and mirror glass heater).

3 Unscrew fastening screws for outside mirror and remove mirror.

4 For installation proceed in reverse order.
